

Maintenance Mate Supplementary Manual

Triumph Speed Triple ABS 2011-2018 (MM-T01)

Secure the bike on a stand.

Remove the seat and locate the diagnostic connector.

If the speedometer is set to MPH reading, change the indication in the dash menu from MPH to Km/h.

Plug the MM connector to the OBD connector.

Set the service interval with the UP and DOWN arrow keys.

Touch and hold both the UP and DOWN arrow key. The new service interval is loaded and the service lamp disappears.

If you have the MM-T02, it will show an error message after set the service date, but the service interval will be loaded.
